

TWM 1000 Electromagnetic Flow Converter Technical Datasheet

34-VF-03-24 August 29th, 2008

Specification

The more than economical solution

The TWM1000 offers a broad range of performance with an outstanding price/performance ratio.

The TWM1000 has been developed for applications requiring an economical solution for the measuring task at a high technological level.

Highlights

- Quick and easy to install and operate
- Large, illuminated graphic display with intuitive operation
- · Multiple user languages as standard
- Maintenance-free
- Outstanding price/performance ratio
- · Extremely quick signal conversion

Industries

- Agriculture
- Heating, Ventilation & Air Conditioning
- Machinery
- Power Plants
- Water
- Wastewater

Applications

- · Measuring homogeneous media
- Water distribution networks and spray-irrigation systems
- Water treatment
- Environmental technology

Figure 1 – TWM1000 Electromagnetic Flow Converter

- 1. Large, illuminated graphic display with intuitive operation
- 2. For AC and DC operation

Options and variants

Modular converter concept

Despite its somewhat different appearance, the TWM1000 has many of the same functions as its "big brother", the TWM9000.

The diagnostics function, conductivity measurement and simple menu navigation, to mention just a few.

This latest member of the transformer family also has a large number of fully-developed functions:

- various auxiliary power supply versions (AC, DC, AC/DC)
- HART as standard
- optional Ex version available

Compact design in various versions

The TWM1000C in the 0° version is ideal for installation in vertical pipes.

The 45° version, on the other hand, allows draining of liquids when it is installed in horizontal pipes. The angled design also improves the readability of the display.

The backlit display provides excellent readability from long distances.

The 4 softkeys enable easy operation, start-up and parametrization.

Both housing versions can be rotated in 90° increments, allowing customer-specific installation positions.

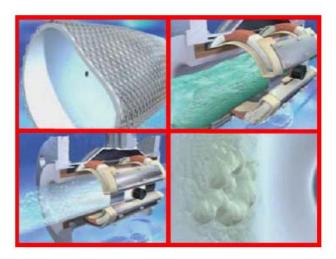

Signal converter in wall version

With the TWM1000W, remote installation is possible in the case of temperature effects, vibration or difficult-to-reach locations.

A signal cable is used to connect the sensor and the converter for the purposes of power supply and signal processing.

The electronics can be used in all housing versions without reparametrization.

Diagnosis

The TWM1000 has been equipped with an extensive diagnostic tool for device function and application tests.

- Conductivity measurement
- Electrode error
- Process or ambient temperature too high

Technical data

Measuring system

| Measurement principle | Faraday's law of induction |
|----------------------------|---|
| Function | Continuous measurement of current volume flow, flow velocity, conductivity, mass flow (at constant density), coil temperature of the measuring sensor |
| Modular construction | The measurement system consists of a measuring sensor and a signal converter |
| Signal converter | |
| Compact version (C) | TWM1000 C (0° & 45° version) |
| Remote version (W) | TWM1000 W |
| Measuring sensor | |
| VersaFlow Mag 100 | TWM1000 C & W: DN10150 / 3/8"6" |
| VersaFlow Mag 1000 | TWM1000 C & W: DN251200 / 1"48" |
| VersaFlow Mag 4000 | TWM1000 C: DN2.51200 / 1/10"48"; |
| | TWM1000 W: DN 101200 / 3/8"48"; |
| VersaFlow Mag 2000 | TWM1000 C: DN2.5250 / 1/10"12"; |
| | TWM1000 W: DN 10250 / 3/8"12" |
| VersaFlow Mag 3000 | TWM1000 C: DN2.5150 / 1/10"6"; |
| | TWM1000 W: DN 10150 / 3/8"6" |
| Communication | |
| Outputs | Current (incl. HART®), pulse, frequency, status output and/or limit switch |
| Counter | 2 internal counters with a max. of 8 counter places (e.g. for counting volume and/or mass units) |
| Verification | Integrated verification, diagnosis functions: flowmeter, empty pipe detection, stabilization |
| Display and user interface | |
| Graphic display | LC display, backlit white; size: 128x64 pixels, corresponds to 59x31 mm = 2.32"x1.22" |
| Display functions | 2 measured value pages, 1 status page, 1 graphic page (measured values and depictions adjustable as required) |
| Units | Metric, British and US units selectable as required from lists for volume / mass flow and counting, flow speed, electrical conductivity, temperature |
| Language of display texts | English, French, German (others on request) |
| Operating elements | 4 keys for operator control of the signal converter without opening the housing |

Measuring accuracy

| Maximum measuring error | ±0.3% of the measured value ±1 mm/s, depending on the measuring sensor (see accuracy curves) |
|-------------------------|--|
| Repeatability | ±0.1 % |

Operating conditions

| Temperature | |
|----------------------------|--|
| Process temperature | See also data sheet for the measuring sensor |
| Ambient temperature | -40+65°C / -40+149°F (ambient temperature 55°C / 131°F and higher: protect |
| | electronics against self-heating, because an increase in the electronics |
| | temperature in 10°C / 50°F steps leads to a corresponding reduction of the |
| | electronics' service life by a factor of two.) |
| Storage temperature | -50+70°C / -58+158°F |
| Electrical conductivity | |
| All media except for water | Min. 5 μS/cm (see also data sheet for the measuring transformer) |
| | Min. 20 μS/cm |

Materials

| Die-cast aluminium | Standard |
|-----------------------|----------|
| (polyurethane-coated) | |

Electrical connection

| Voltage | Standard: 100230 VAC (-15% / +10%), 50/60 Hz | | | | | |
|-------------------|--|--|--|--|--|--|
| | Option 1: 24 VDC (-55% / +30%) | | | | | |
| | Option 2: 24VAC/DC (AC: -15% / +10%; DC: -25% / +30%) | | | | | |
| Power consumption | Standard: 8 VA | | | | | |
| | Option 1: 4 W | | | | | |
| | Option 2: AC 8 VA; DC: 4 W | | | | | |
| Signal cable | Only for remote versions | | | | | |
| A: type DS 300 | Max. length: 600 m / 1950 ft (depending on electrical conductivity and measuring sensor version) | | | | | |
| Cable entries | Standard: M20 x 1.5 | | | | | |
| | Option: ½" NPT, PF ½ | | | | | |

Outputs

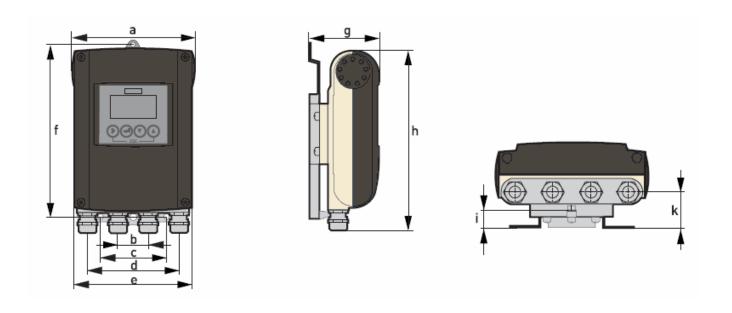

| Current output | | | | | | | | |
|-----------------------|--|---|--|--|--|--|--|--|
| Function | Measurement of volume and mass (at cor | stant density), HART [®] communication | | | | | | |
| Settings | Without HART® | With HART® | | | | | | |
| | Q = 0%: 015 mA | Q = 0%: 415 mA | | | | | | |
| | Q = 100%: 1021.5 mA | Q = 100%: 1021.5 mA | | | | | | |
| | Error identification: 022 mA | Error identification: | | | | | | |
| Operating data | | 1 | | | | | | |
| Active | U _{int,nom} = 24 VDC | | | | | | | |
| | I ≤ 22mA | | | | | | | |
| | $R_L \le 750 \Omega$ | | | | | | | |
| Passive | U _{ext} ≤ 32 VDC | | | | | | | |
| | I ≤ 22mA | | | | | | | |
| | $U_0 \le 2 \text{ V at I} = 22 \text{ mA}$ | | | | | | | |
| Pulse or frequency or | utput | | | | | | | |
| Function | Can be set as a pulse output (e.g for voluoutput | ume or mass counting) or frequency | | | | | | |
| Settings | For Q = 100%: 0.0110000 pulses per se | cond or pulses per unit volume | | | | | | |
| | Pulse width: setting automatic, symmetric | or fixed (0.052000 ms)manual | | | | | | |
| Operating data | | | | | | | | |
| Passive | U _{ext} ≤ 32 VDC | | | | | | | |
